Task: 2

Reviewed Prototype : C856 Prototype

Prototype of : Tyler Yeager

Feedback : Honestly, I found that the prototype site is easy to get lost on and to find some information I had to go through multiple links when I expected the information to be easier to find.

Task: 3

Reviewed Prototype : Taniti Website

Prototype of : Adam Thorne

Feedback : Its a good solid prototype with most things really well done and laid out. It also had multiple ways to pull up information quickly.

Task: 4

Reviewed Prototype : C856 Tanitian website prototype

Prototype of : Frederick Hoefler

Feedback : The prototype is well designed and the layout is easy to understand besides finding the FAQ section.

Project Review

Review: 1

Feedback : Overall the website had a very familiar feel and I could find all the information in the logical places. I had no issues accomplishing any of the tasks and nothing seemed out of place or incongruous. The only feedback I have is regarding the 'Taniti' image/logo on the top left of the screen. Typically a logo in a corner is also a link to the home page; and I would've expected this to behave as a link.

Review: 2

Feedback : Overall was a good look and feel, the use of secondary menu options on the transportation menu seemed a little arbitrary since the page is not that long and no other pages included them. It was nice to see that they had functionality though. I didn't notice them during the recording however, I went back and double checked the prototype and saw that they work

Review: 3

Feedback : Intuitive navigation and nice prototype. I found the objectives without difficulty. Only thing I might say is maybe polish a little here or there, line up the visuals a bit so the eye follows naturally. Could consider some links on the page itself, but that's just taste.
